

Yes, **ProjectWise** is a well-known engineering project collaboration and document management software developed by **Bentley Systems**. It is primarily used in industries like **architecture, engineering, and construction (AEC)** to manage large-scale infrastructure projects.

Key Features of ProjectWise:

- **Document & Drawing Management:** Centralized storage and version control for engineering documents and CAD files.
- **Collaboration:** Supports team collaboration across multiple locations with cloud-based access.
- **Workflow Automation:** Automates engineering workflows and approvals.
- **Integration:** Works with applications like **AutoCAD, MicroStation, Revit**, and other design software.
- **Security & Compliance:** Ensures regulatory compliance and access control for sensitive project data.

It is widely used by engineering firms, government agencies, and construction companies for managing complex projects.

Are you looking into using **ProjectWise** for your **Engineering Document Management solution**? Or do you need alternatives?
